Referral for a Language Disorder

Directions:

Review each item if your child does not demonstrate a particular skill at a given developmental age, **then print out this and check each option that applies:**

Click to Print This Page

Referral to a Speech-Language Pathologist is necessary when:

- By AGE 1, Does not respond to music and/or singing
- Cannot understand simple questions
- Does not look at familiar people when named
- Does not maintain eye contact, attention to speaker
- Little interest in social interaction, language, or pointing
- Does not say mama or dada
- Does not begin to imitate words
- Does not say 1-2 words imitatively

- By AGE 2, cannot identify basic body parts
- Cannot understand simple commands, like give me without gestures
- Does not demonstrate action words (i.e., eat)
- Does not speak using 1-2 words at a time
- Does not use new words frequently, at least 50 words

- By 2-1/2, Does not use short sentences
- Does not respond to hello and bye consistently

- By AGE 3, Does not relate experiences verbally
- Does not state first/last name

- By AGE 4, does not use short but grammatically correct sentences
- Does not understand comparisons or make basic inferences

- By AGE 5, does not use complex sentences
- Does not explain how to do something
- Does not respond to why questions with a reason
- Does not understand complex directions
- Does not understand concepts
- School-Age Receptive Language - Exhibits difficulties understanding teachers instructions and/or following directions
- Exhibits difficulties in reading comprehension across subjects
- Exhibits difficulties in mathematical reasoning, learning numbers, and/or concepts and applications
- School-Age Expressive Language - Difficulties in oral and/or written expression including appropriate use of words, grammar, and underlying meaning
- Difficulties in basic reading skills, including the ability to decode letters and words and attain information
- Difficulty interpreting and applying abstract written information

The above items can be used as a basic screening tool to determine if your child needs services. This checklist can be brought to the evaluation as part of the case history intake information. If you checked several items in your child's category or if there are gaps in development, please contact the uPs Therapy office to schedule an evaluation at (864) 438.0990. Insurance is accepted for most companies.
